EDUCATION

UNIVERSITY OF MASSACHUSETTS AMHERST
Computer Science
Expected May 2017 | Amherst, MA
Major GPA: 3.63 / 4.0
Cum. GPA: 3.32 / 4.0

UNIVERSITY OF CONNECTICUT STORRS
Electrical Engineering
2013-2014 | Storrs, CT

COURSEWORK

UMASS
Data Structures
Linear Algebra
Advanced Assignments for Intro to Prog.
Introduction to Programming

UCONN
Basic Low Level Programming with C
Matlab Programming for Engineers

HOBBIES

Ultimate Frisbee
Running
Built computers for personal use
Yearly IAB Children's Fair – 2009-2013

EXPERIENCE

KRONOS | Service Oriented Software Engineer Intern
June 2015 – Sep 2015 | Chelmsford, MA

Worked as a software engineer providing assistance to the Attestation Toolkit team.

- Developed a module for Workforce Central product that provides an updated interface for managers to calculate and manage meal penalties for Puerto Rican workers. The implementation is written in Java, JavaScript, JSP files, JQuery and MSSQL.
- Testing of various fixes and bugs.
- Simple penetration testing on core modules.
- Various customer interaction, starting from the design phase to the roll-out phase.

RELEVANT PROJECT WORK

PARTY SMART | Partysmart.azurewebsites.net
Oct 2015 – Present

PartySmart is a party registration web application that allows off campus students to register their parties with Umass Off Campus Student Services. Residents within a quarter mile radius can directly complain to party hosts through the web app rather than involving the police.

- One of top 8 projects at HackUmass amongst the 69 projects submitted and winner of Umass Off-Campus Student Services sponsor prize.
- Built with Node.js/Express using mongodb, Bing Maps api, and Google's Materialize library.
- I was tasked with implementing Bing maps, handling data sent between the front-end and back-end along with improving the UI.

FRIEND.ME | Mobile Application
Oct 2015 – Present

An app that matches individuals to other people around them according to their interests and proximity. It allows them to get in touch and to set up a meeting. It can suggest restaurants, bars, group activities around them as a possible place to meet.

- Winner of the BostonHacks $1k entrepreneurship prize from 1517 Fund
- Written primarily in Swift

FAF CLIENT | Micheljung.github.io/downlords-faf-client
June 2015 – Present

A reimplementation of the python based FAForever client. It is a 3rd party client that supports the unsupported game Supreme Commander.

- Written in Java and JavaFX using the Spring framework and Gradle as a dependency manager.
- Used by over 2500 people daily, ranging from a few minutes to 24 hours of usage.

CLASSROOM MEETUP | HackMeet.me
April 2015

The Classroom Meetup Project designed and built during the 36 hour event HackUMass 2015.

- Written in Python, Jquery, Css and HTML using Django to serve pages
